

The new generation of sliding glass door systems
MasterTrack[®] FT & BT

Maximum comfort. Minimal installation effort.

NEW STANDARDS IN TECHNOLOGY, DESIGN AND COMFORT

Modern interior design calls for holistic room concepts that combine minimalist design with maximum comfort.

While good design is recognisable at first glance, comfort is usually in the detail and only becomes clear with use.

This is also the case with the high-tech solution from MasterTrack®. The high-quality look of the system goes hand in hand with sophisticated sliding door technology. It is made up of three components: track, roller system and clamping mechanism, and makes both installation and use particularly easy.

Using sliding glass doors is not only a space-saving design device but they are also ideal as room dividers and visual features in generously designed living areas. This is the case for classic wall mounting, as a telescopic solution or for mounting flush with the ceiling.

With MasterTrack® you have the right system for every application.

MASTERTRACK® FT

MasterTrack® FT wall mounting	6 – 9
MasterTrack® FT ceiling mounting	10 – 15
MasterTrack® FT Accessories	16 – 17
MasterTrack® FT Black	18 – 19

MASTERTRACK® BT

MasterTrack® BT Ceiling & wall mounting	20 – 21
MasterTrack® BT Telescopic	22 – 23
MasterTrack® BT Flush ceiling	24 – 25
MasterTrack® BT Wooden door	26 – 27
MasterTrack® BT Components	28 – 31

ADDITIONAL PRODUCTS

Sliding door handles	32 – 35
Handling	36 – 37
Tools	38
Protection films	39

MASTERTRACK® FT

With MasterTrack® FT, Bohle offers a high-tech complete solution for sliding door systems that impresses with revolutionary running gear and noticeable smoothness. The special feature: The entire assembly requires only a few processes. The installation is therefore quick, intuitive and cost-saving.

Safe anti-jump protection

The protective mechanism ensures reliable protection against door jumping, even with a powerful swing.

Solid metal frame

The solid, continuous metal frame ensures that the damper always remains precisely in its guide.

Unique roller system

High-quality ball bearings and large castors ensure a noticeable lightness and unique smoothness.

Easy mounting from the front

Mounting is conveniently done from the front. From there, all adjustment options such as the height setting, the positioning of the cushioning and the anti-lift device can be reached quite comfortably.

MASTERTRACK® BT

The special design of the MasterTrack® BT sliding door series is used when the installation requires more than simple ceiling or wall mounting. With MasterTrack® BT's modular system, there are no limits to the room design. With only a few individual components and thanks to the compact track in which the glass suspension is located below the carriage, single and multi-leaf doors as well as flush ceiling designs can be installed in no time at all.

Compact running track

Suitable for various applications, e.g. as a two- or three-leaf telescopic solution or for flush ceiling installation.

Rollers with retraction damping

The sliding door is gently and smoothly slowed down in one movement by the dampers. One retraction damper replaces one standard runner.

Glass clamp

For most MasterTrack® BT applications, including classic wall and ceiling mounting as well as the telescopic solution.

With the glass mounting profile
you can also mount the sliding
door on glass.

MASTERTRACK® FT WALL MOUNTING

1-leaf wall mounting

1-leaf wall mounting on glass

2-leaf Synchro without fixed glazing
wall mounting

Product highlights

- Impressively smooth running
- Smooth closing mechanism
- Safe anti-jump protection
- Elegant appearance in the weight classes 60, 80, 120 and 150 kg
- Intuitive and cost-saving assembly
- All settings conveniently accessible from the front
- Modular design in all weight classes
- Metal shock absorbers with high-quality hydraulics and double-sided
- Synchronously opening systems possible

MasterTrack® FT 60 Set wall mounting

- Glass thickness door: tempered glass 8 - 12 mm, laminated safety glass 8.76 - 12.76 mm
- Minimum door width 600 mm
- Max. door weight 60 kg
- The running track is pre-drilled

MasterTrack® BT Supplementary Profile for Fixed Sidelights

This supplementary profile can be attached either to one or both sides of the MasterTrack® BT running track and enables inserting and stabilising fixed sidelights.

- Max. door weight 120 kg
- Glass thickness: 8 - 10 mm

APPLICATION	LENGTH	FINISH	ART. NO.	SU
Standard / Telescopic	2000 mm	Aluminium-coloured E6 C0	BO 5802031	1x

MasterTrack® BT Wall Distance Profile

The wall distance profile increases the distance between wall and glass by 8 mm.

- Max. door weight 120 kg

APPLICATION	LENGTH	FINISH	ART. NO.	SU
Standard / Telescopic	2000 mm	Aluminium-coloured E6 C0	BO 5802061	1x

MasterTrack® BT Profile Set for installation flush with the ceiling

The MasterTrack® profile set includes all required profiles for flush ceiling installation with one guide, including two optional retainers for fixed glazings

- Max. door weight 120 kg
- Includes support profile for fixed sidelights

APPLICATION	LENGTH	FINISH	ART. NO.	SU
Installation for one door	3000 mm	Aluminium-coloured E6 C0	BO 5803051	1x
Installation for two doors	3000 mm	Aluminium-coloured E6 C0	BO 5803061	1x

MasterTrack® BT Snapframe and Cover Caps for pair of Glass Clamps

Special snapframes and cover caps which can be directly attached to the glass clamps. As this running track does not have a separate cover, it can be integrated (and therefore concealed) into the ceiling. Important: Please order the pair of glass clamps (BO 5800001) separately (not included in delivery).

- Max. door weight 120 kg
- Glass thickness door: 8 - 12.76 mm

APPLICATION	LENGTH	FINISH	ART. NO.	SU
Standard	1240 mm	Aluminium-coloured E6 C0	BO 5801271	1x

MasterTrack® BT Cover Caps

The cover caps included in the MasterTrack® BT series can be mounted quickly and easily. They are available in different sizes depending on the application.

APPLICATION	DIMENSIONS	FINISH	ART. NO.	SU
Standard	85 x 42 mm	Aluminium-coloured E6 C0	BO 5804281	1x
Standard	85 x 50 mm	Aluminium-coloured E6 C0	BO 5805081	1x
Standard	85 x 60.5 mm	Aluminium-coloured E6 C0	BO 5806081	1x

MasterTrack® BT accessory set for wooden door

Thanks to the accessory set for wooden doors, MasterTrack® BT can be used not only for pure glass but also for wooden sliding doors with a thickness of 25 mm. Even a modern mix of glass and wood - two materials that could not be more different - is no longer an obstacle with the accessory set.

- Suitable for 25 mm wooden door leaf

APPLICATION	ART. NO.	SU
Standard	BO 5800013	1x

MasterTrack® BT Carriages

High quality carriage for all MasterTrack® BT applications

- Max. door weight 120 kg

APPLICATION	ART. NO.	SU
Standard / Telescopic / Flush with the ceiling	BO 5800002	1x

MasterTrack® BT Glass Clamp

Glass clamp for most MasterTrack® BT applications, including classic wall and ceiling installations, and telescopic applications.

- Max. door weight 120 kg
- Glass thickness door: 8 - 12.76 mm

APPLICATION	ART. NO.	SU
Standard / Telescopic	BO 5800001	1x

MasterTrack® BT Glass Clamp Sets for installation flush with the ceiling

Glass clamps for mounting MasterTrack® BT flush with the ceiling in combination with Profile Sets for flush mounting. The set also includes the bottom guide for one door.

- Max. door weight 120 kg
- Glass thickness: 8 - 12 mm
- Includes Bottom Guide

APPLICATION	ART. NO.	SU
Flush with the ceiling for 1 door	BO 5800011	1x
Flush with the ceiling for 2 doors	BO 5800012	1x

MasterTrack® BT Carriages incl. Damping Mechanism

Optional metal dampers for all MasterTrack® BT applications.
Equipped with hydraulics and double-sided spring guidance. The sliding door is braked by the damper in one smooth, fluid movement. A self-closing damper replaces a standard carriage.

Minimum door width:

60 kg: damping on one side = 500mm / damping on both sides = 625mm

80 kg: damping on one side = 560mm / damping on both sides = 780mm

120 kg: damping on one side = 600mm / damping on both sides = 825mm

- High quality hydraulics
- Double-sided spring guidance
- A closing damper replaces a standard carriage

MAX. DOOR WEIGHT	ART. NO.	SU
60 kg	BO 5800060	1x
80 kg	BO 5800080	1x
120 kg	BO 5800120	1x

MasterTrack® BT Synchro Accessories Set

Optional synchronous deflection for simultaneous opening and closing of two doors. Suitable for the classic wall or ceiling mounting.

- Max. door weight 120 kg

APPLICATION	ART. NO.	SU
Standard / Flush with the ceiling	BO 5800005	1x

MasterTrack® BT Telescope Accessories Set

Accessory set for simultaneous opening and closing of two doors in telescopic alignment with two guides.

- Max. door weight 120 kg
- Glass thickness door: 8 - 10.76 mm

APPLICATION	ART. NO.	SU
Telescopic for two doors	BO 5800006	1x

Accessory set for simultaneous opening and closing of three doors in telescopic alignment with two guides

- Max. door weight 120 kg
- Glass thickness door: 8 - 10.76 mm

APPLICATION	ART. NO.	SU
Telescopic for three doors	BO 5800007	1x

MasterTrack® BT Adaptor for wall mounting

Used for mounting telescopic applications with two guides to a wall.

- Max. door weight 120 kg
- 5 adapters per metre necessary

APPLICATION	ART. NO.	SU
Telescopic	BO 5800010	1x

U-Channels 20 x 17

- Size 20 x 17 x 20 x 1.5 mm

Sliding Door Handles

Lockable Rod Handle

The lockable rod handle is a comfortable locking system with the lock positioned in a convenient, ergonomic height. It is well suited for all standard 30/160 Euro profile cylinders. The cylinder is easily exchangeable and can therefore simply be adapted to individual locking systems. Both double and knob cylinders can be used for this system. With a length of either 1200 or 1900 mm and a downward closing mechanism, the rod handle is universally applicable for sliding and swinging doors.

- Width (ø) 35 mm
- Depth (H) 77 mm
- Stainless steel AISI 304
- Finish brushed

Tools

VetroLevel Fixing aid with integrated spirit level

Small helper – great benefit: VetroLevel enables the quick horizontal positioning of glass panes. Fasten the little helper in a way that you can keep an eye on it during installation. The proven vacuum technology of the Veribor® suction pad holds it safely in place. Now you have both hands free to comfortably align the glass pane without the need for a spirit level. VetroLevel therefore ideally supports the installation of VetroMount® and is also perfectly suited for mounting all-glass showers or partition walls. No matter where you need to align a glass pane horizontally for mounting – VetroLevel is there to help. And if you want to use it on materials other than glass, the Veribor® suction pad can be attached to all smooth and gastight surfaces, making VetroLevel even more versatile.

- Suction pad ø 90 mm
- Temperature range -10°C - +40°C
- Quick installation

Shims Euroclick Type 3 , 40 x 30 mm

Shims are used in window and door construction, as well as in interior and dry fit-out. They serve for compensating uneven surfaces and for quick alignment. The ratchet prevents the shim from slipping away from the screw. Thanks to this mounting aid, the shim can be easily positioned.

- Compensation/shimming of profiles (e.g., FrameTec Select 2.0, MasterTrack® FT) in case of uneven walls
- Bag with 100 pieces
- With Mounting Aid
- With ratchet
