

Elegant balcony and terrace glazing

FloorTrack

Being outside – without being outside

BEING OUTSIDE — WITHOUT BEING OUTSIDE

How does this work? With the new floor-guided sliding door system from Bohle. Whether it is for a private summer garden or for practical terrace partitioning in the catering trade: with FloorTrack, you create a mobile and transparent partition wall that elegantly separates outdoor areas from each other.

Depending on your preference, you can choose between two bottom tracks: While one variant is recessed in the floor, an attached running track can also be fitted. Three to five sliding elements with a maximum width of 1.10 m each are possible for a timeless glass partition.

Product highlights

- Installation with recessed or surface-mounted floor rail
- 3-5 sliding elements possible
- Total widths of over 10 m can be achieved thanks to connecting elements
- 3 finishes available: White (RAL 9010), anthracite grey (RAL 7016) and aluminium coloured anodised
- Perfect alignment thanks to height adjustability

FloorTrack

Both narrow and wide glass partition walls can be achieved with FloorTrack: On the one hand, the floor profiles can be individually shortened, and on the other, they can be joined together with the help of connecting elements to create a total width of over 10 metres. This creates impressive glass fronts in a modern style.

As the individual glass panes made of 10 mm toughened safety glass have a catch function, the open partition can be closed in no time at all. With three finishes of white, anthracite grey and anodised aluminium, FloorTrack adapts perfectly to any environment. The high-quality processed fittings are all anodised or powder-coated and therefore offer the corrosion protection that is necessary for outdoor use: The height adjustability guarantees perfect alignment of the panes for a seamless installation..

FLOORTRACK components

FloorTrack top track

The surface-mounted version of the FloorTrack track enables quick and uncomplicated installation and offers a simple solution for drainage due to its sloping design.

- When combined with wall profile, the lower end pieces are required
- For use without wall profile, the cover cap set is required.
- Material aluminium

Attached running rail

Recessed running rail

Recessed running rail with a ramp profile

Recessed running rail with two ramp profiles

FloorTrack recessed track

The recessed version of the FloorTrack running track enables installation at ground level, where the running track disappears completely into the floor. Alternatively, this track can be mounted on top and equipped with side ramp profiles as a further barrier-free option.

- Side ramp profiles are required for surface-mounted installation.
- Material aluminium

FloorTrack lower end pieces for running track

These end pieces for the FloorTrack surface-mounted running track replace the last piece of the running track and therefore enable a seamless connection of the wall connection profiles. The end pieces are simply inserted into the running rail.

- Lateral pull-off dimension for attached runner: 40 mm per side
- The bottom end piece is only required with top track in combination with side wall profiles.
- Material plastic
